

COMPANY PROFILE

Software that runs **real businesses.**

JOMos (JOM Online Services) is a Kuala Lumpur software house. Since 2018 we have designed, built and operated web platforms, e-commerce stores, AI agents and the cloud infrastructure underneath them, for clients in training, healthcare, automotive, events and retail, and for our own products.

WHO WE ARE

A small team that ships and keeps things running

We are engineers first. Every project is led by the developer who will also deploy it, monitor it and answer your WhatsApp when something needs attention. We work mostly in Laravel and WordPress, host on DigitalOcean and our own machines, and run the same stack for our own products as we do for clients.

80+

Projects delivered since 2018

40+

Clients to date

30+

Systems in production today

WHAT WE DO

Services

Web platforms & custom systems

Training management, CRMs, booking and marketplace platforms, reporting tools. Laravel, MySQL, real-time with Laravel Reverb.

E-commerce

Bagisto and WooCommerce stores with local payment gateways, delivery workflows and admin back offices built for volume.

AI agents

Order-taking, customer-service and document-analysis agents on the Claude API, connected to WhatsApp, web chat and your existing systems.

Websites

Fast, SEO-ready WordPress and custom sites with real content, contact forms and analytics.

Cloud infrastructure & DevOps

Provisioning, one-click Git deployments, TLS, backups and Prometheus monitoring through our own JIMys platform.

Consulting & support

Architecture reviews, rescue of stalled projects, ongoing maintenance retainers with direct developer access.

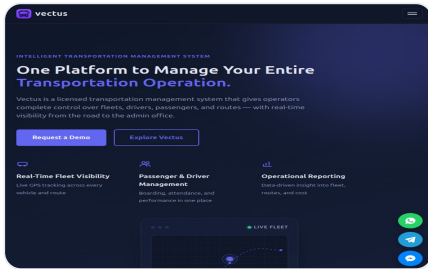

HOW WE WORK

From first call to production

1. **Discovery.** A short call and a written scope with a fixed quote. No hidden fees.
2. **Design & build.** Weekly demos on a staging site you can open from day one.
3. **Launch.** Domain, TLS, backups and monitoring set up before go-live.
4. **Operate.** Maintenance, updates and support from the same engineers who built it.

SELECTED WORK

Projects

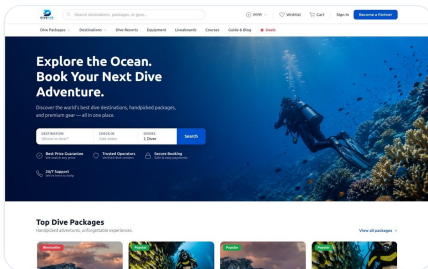

Vectus

Fleet Management · Client project · 2026

A bus and fleet management platform that tracks staff pickup buses in real time using the drivers' phones as GPS trackers, with route assignment, trip history and live monitoring for the transport team.

Stack: Laravel 12, Tailwind CSS, Alpine.js, Leaflet maps

Live: vectus.jomos.com.my

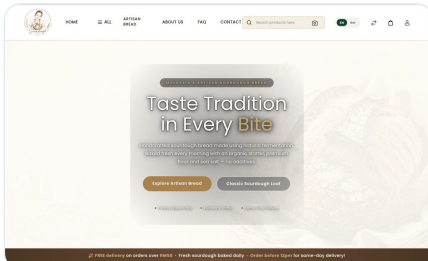

DiveHub

Marketplace · Own product · 2026

A marketplace for dive courses, dive resorts and dive gear in Malaysia, connecting divers with certified instructors, liveaboards and dive shops through one booking platform.

Stack: Laravel 12, MySQL

Live: divehub.jomos.com.my

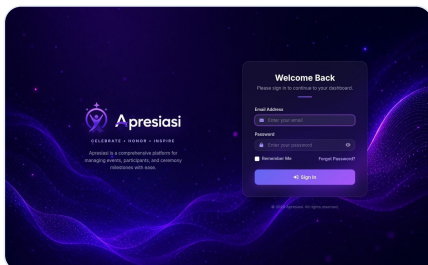

Sourdough.my

E-commerce · Own product · 2026

An online storefront for artisan sourdough products with a branded catalogue, cart and checkout, payment handling, order management and delivery or pickup options.

Stack: Laravel 12, Bagisto, Stripe

Live: sourdough.my

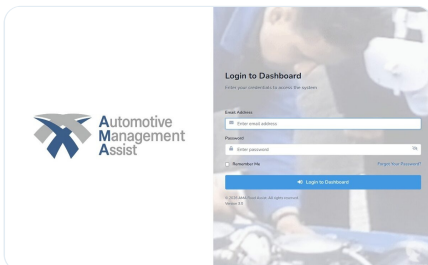

Apresiasi

Event System · Client project · 2025

A convocation and award ceremony attendance system that manages graduate check-in, seating and on-stage announcements, built to run reliably on a local network during the event.

Stack: Laravel 12, Livewire, Laravel Reverb (real-time)

Live: apresiasi.jomos.com.my

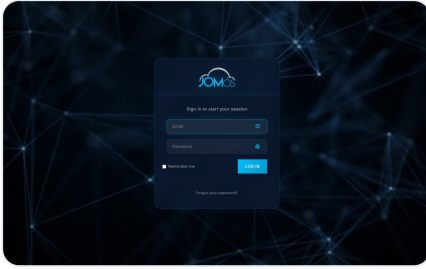

AMA CRM

CRM & Call Centre · Client project · 2018

A CRM built and maintained for Automotive Management Assist, integrated with their PBX for real-time call wallboards and reporting, plus WhatsApp and SMS communication.

Stack: Laravel 12, Laravel Reverb, PBX integration, Excel reporting

Live: crm.ama2u.com

JIMys

Business Management · Own product · 2018

The JOMos Integrated Management System, our in-house platform for customers, opportunities, quotations, invoices, servers and one-click deployments across every project we run.

Stack: Laravel 12, Alpine.js, GitLab & DigitalOcean APIs

Live: jimys12.jomos.com.my
